

On the Go and Ready to Grow

GRR Aerosols, the Giant of Aerosol Recycling, has relocated to Attalla, AL. This move brings a number of exciting changes for our customers including **increased capacity, expanded waste codes, and one-day approvals**. But one fact will not change, and it is the very reason we are the first choice of the most environmentally responsible fillers and marketers – **SAFE, RELIABLE, AND ECONOMICAL DISPOSAL**.

*U.S. or Canada, full truckloads or LTL's – if you scrap it, we recycle it.
And we'll save you money too.*

What Sets **GRR Aerosols-Attalla** Apart?

- More aerosol recycling/destruction capabilities than anyone in North America – 70 million pounds destroyed since 2000
- Environmental integrity of **Giant Resource Recovery**, one of the most respected waste management companies on the Continent
- Part of an international company with greater than \$5.5 billion in assets and projected revenues of \$2 billion in 2007

Grr! Aerosols
